

# Situation der bekanntesten Start- und Landeplätze von Annecy (Stand 2004)

## FREE FLIGHT SITES in the ANNECY BASSIN

### 1 Montmin: mixed take off 1260 m

Pedestrian access following the arrows.

**Speed limit 20 km/h** after first cattle grid.

Top wood area access reserved for:

- \* forestry and local farmers
- \* local schools and SIV courses
- \* the official shuttle bus displaying badges

The professionals have priority on the second paraglider take off to the south of the hang glider ramp.

Prepare your wings back from the take off zone.

**CAMPFIRES ARE FORBIDDEN.**

### 2 Coche-Cabane: paragliding take off 1180 m

Pedestrian access by the path continuing the road leading to the bottom Montmin wood area.

### 3 Planfaiet: paragliding take off 950 m

Park your car with consideration for others.

**Speed limited to 40 km/h** on the forest road that leads to the take off. Avoid low altitude overflight of the little chalet to the south of take off. Keep the site tidy.

**CAMPFIRES ARE FORBIDDEN**

### Col des Frêtes 1580 m

Avoid soaring flights on the grass 'gums' of the Dents de Lanfon and the Lanfonnet from April to June (fauna breeding season).

### The Semnoz 1680 m / 1480 m

Hang gliding, paragliding, aeromodelling, kite and kite-surf.

### Important: respect the aeromodelling zone:

from the point 1610.40 on map IGN 3431W:

100m to the north, 500m to the west, 200m below, 250m above.

Paragliding take off forbidden from the 'Sur Frêtes' site.

**Attention! St Sylvestre is in the air corridor for Meythet aerodrome:  
FREE FLYING FORBIDDEN**

### Useful Numbers

Rescue: Tel. 18 or 112  
Canal E: 161,300 Mhz

Weather monitor: FFVL frequency 143,9875 Mhz

Meteo Chamonix: 08 92 68 02 74

Gliding weather: 08 92 68 10 14,

Then '74 and 1 (daily forecast) or 2 (forward forecast)

### 2 Doussard: principle mixed landing field 465m, Glide: 4.9

Field open to the 3 activities: kite, hang gliding, paragliding. Beware in strong southerly winds, impossible to reach Doussard landing.

Overflight of the nature reserve forbidden below 200m.

Be careful of the power line on the southern approach.

Beware of the valley wind inversion in the evening.

Approach sense: Hand gliders: the side nearest to the mountain

Paragliders: the side nearest to the community centre

Landing markings:red tyres: hang gliding (80 x 30 m)

white tyres: paragliding (60 x 30 m)

Don't park along the route de Marceau.

Shuttle bus, snack bar, there are rubbish bins and toilets.

### 3 Verthier emergency landing field 450 m

Side nearest lake:

approach and landing for hand gliders

Side nearest mountain

approach and landing for paragliders

Overflight of the nature reserve forbidden below 200m.

Practice inflations are forbidden, permitted on Doussard landing area.

### 4 Perroix : paragliding landing field 540 m

Overflight of the villas below 150m is forbidden.

Be careful of the power line to the west of the field.

No practice inflations in the fields surrounding the landing field

Keep to the path when walking to the parking area.

Avoid driving through Perroix village.

### 5 Thoron : paragliding landing field 550 m

144 m long.

Be careful barbed wire on the south side of the landing area.

Use the pedestrian path specifically dedicated between Thoron landing area and Perroix road.

### Bauges national nature reserve

Reminder of the agreement signed between the nature reserve and the FFVL in 1993:

Take off zone authorised between the Dent de Pleuven, the Trelo and the Dent des Portes. Overflight below 300m forbidden.

The limit of the reserve is marked on maps: refresh your memory each year.

**Be especially careful in the period april - june:** nesting and counting of the animal population.
